

HURRICANE PROTECTION

Our Sliding Glass Door Systems comply with the performance standards of the Florida Building Code, offering enhanced noise reduction, increased security, 99% UV protection, and effortless hurricane protection.

ENERGY EFFICIENCY

Doors meet Florida Energy Code standards and are certified by the National Fenestration Rating Council. They are available with a variety of low-emissivity (low-e) glass coatings and tints to minimize heat transfer and reduce energy costs.

HARDWARE & COMPONENTS

Manufactured with the highest quality materials, we offer a comprehensive selection of handle options and colors. **Handles** available include the Allure, Olympus, and Signature series, which are offered in various paint or metal finishes. **Rollers** have stainless steel precision bearings, and are encased in aluminum housing. These components ensure smooth operation and durability.

FINISHES

Our aluminum products are painted with a high-performance powder coat finish and are available in White, Bronze, and Black. Additionally, a Clear Anodized finish is offered. Custom wood grain and two-tone finishes can be accommodated upon request.

PRODUCT FEATURES

- Aluminum Allure, Olympus and Signature handles
- Aluminum recessed handle (Optional)
- Handles are available in variety of painted or metal finishes
- Impact insulated glass for improved SHGC and U-value
- 9/16" laminated to meet Florida Energy Code for SHGC
- Stainless dual mortise lock
- Tandem roller w/precision bearings & aluminum outer housing
- Maximum panel size 52" x 102 1/2" and 48" x 120"
- Built in sill track drain system
- Heavy-duty anodized sill track
- Jamb snap covers to conceal anchors
- High performance powder coat and class II Clear Anodized
- Doors are approved under NFRC for energy efficiency
- Deluxe box screen with stainless hardware
